

SP5

The 5-th International Conference on Semiconductor Photochemistry

The conference will deal with the following topics:

- Solar to Electricity Conversion (DSSCs)
- Solar to Chemical Energy Conversion (Water splitting and CO2 reduction)
- Air and Water Remediation
- Photosterilisation, Self Cleaning Surfaces
- Organic Photosynthesis
- New Photoactive Materials
- Mechanistic Studies, Engineering, Modelling
- Commercial Applications, Standardization

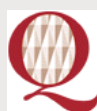

July 27-31, 2015
