A Special Issue on

Doped Nano-structures for Energy and Electronic Applications

CALL FOR PAPERS

The aim of this themed issue is to bring together the recent advances in synthesis and characterization (both experimental and computational) techniques of doped functional nanomaterials with the focus on elucidating their practical applications. Therefore, we invite submission of original research and comprehensive review papers to this special issue on the following related topics:

- Doped Nanomaterials for Energy (Photovoltaic and Electrochemical Applications) and Electronic Devices,
- Synthesis, Growth, Fabrication and Processing of Functional Materials,
- Characterization of Doped Nanomaterials and Molecules on Surfaces,
- Dopants, Vacancies and Defects in Surfaces and Interfaces,
- Further Studies Advancing and Understanding the Function of Doped Materials.

GUEST EDITORS

Dr. K. Muthukumar,
Institute of Theoretical Physics,
Goethe University, Frankfurt, Germany
kaliappan.muthukumar@gmail.com

Dr. J. Andreas Larsson,
Materials Theory,
Uppsala University, Sweden.
andreas.larsson@fysik.uu.se

MANUSCRIPT SUBMISSION

Manuscripts must be prepared according to Journal's guidelines, available at <http://www.aspbs.com/acl>

Submit your manuscripts in the form of PDF or Word directly to dopeforgood@gmail.com

All papers submitted to this issue will be subject to a strict peer review process to ensure high quality articles. Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere.

Please notify well in advance your intention to submit a research paper.

KEY TIMETABLE DATES:

Manuscript due : **September 15, 2012**
Authors' notification : **October 15, 2012**
Publication date : **December 2012**
