## ELSEVIER

## Latest Impact Factors

Known for rapid publication times, selectivity and rigorous coverage of the field, the following journals continue to serve areas in **Functional and Metallic Materials**.

Acta Materialia is ranked #1 in the category Metallurgy & Metallurgical Engineering, <u>Corrosion Science</u> is #2, <u>Scripta</u> <u>Materialia</u> is #3 and the <u>Journal of Alloys and Compounds</u> is #4! Additional highlights from the latest if results include ...

Listed by highest Impact Factor

| Journal title  | 2011 Impact<br>Factor |
|--|-----------------------|
| <u>Acta Materialia</u>   | 3.755                 |
| Corrosion Science  | 3.734                 |
| <u>Scripta Materialia</u>  | 2.699                 |
| Journal of Alloys and Compounds  | 2.289                 |
| Synthetic Metals   | 1.829                 |
| <u>International Journal of Refractory Metals and Hard</u><br><u>Materials</u> | 1.693                 |
| <u>Calphad</u>   | 1.669                 |
| Intermetallics   | 1.649                 |
| Materials Science & Engineering B  | 1.518                 |
| Materials Science in Semiconductor Processing                                  | 0.753                 |

## **Journal Performance Measurements**

Journal performance measurements offer a systematic, objective means to critically evaluate journals, and several indicators are available.
